

WHAT TO DO? TSUNAMI PREPAREDNESS

1. Be aware of tsunami facts. This knowledge could save your life!
2. Share this knowledge with family and friends. It could save their lives!
3. Determine if you live, work, play, or transit a coastal low lying area or tsunami evacuation zone.
4. If you live in a tsunami evacuation zone and hear that there is a tsunami warning, your family should evacuate your house. Walk in an orderly, calm manner to the evacuation site or to any safe place outside your evacuation zone. Follow the advice of local emergency and law enforcement authorities.
5. If you are at the beach or near the ocean, and you feel the earth shake, move immediately inland to higher ground. DO NOT wait for a tsunami warning to be issued. Stay away from rivers and streams that lead to the ocean due to strong tsunami wave action and currents.
6. If you are in school and you hear there is a tsunami warning, you should follow the advice of teachers and other school officials.
7. High, multi-story, reinforced concrete buildings along coastal areas can provide a safe refuge on the third floor and above, if you are unable to quickly move inland.
